

Wound Documentation Updates & Reminders

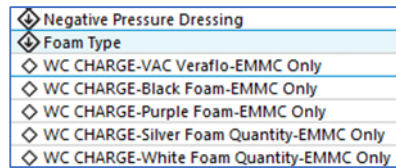

Open to Air documentation is now located in **Dressing Activity**.

Only EMMC should document the WC Charge options and these should only be selected if the dressing was changed.

Dressing Activity

- Applied
- Changed
- Moistened
- WC CHARGE-NPWT Changed less/=50 sqcm (EMMC Only)
- WC CHARGE-NPWT Changed greater than 50sqcm (EMMC Only)
- Open to air
- Packing inserted
- Reinforced
- Removed
- Self removed
- Unintentionally removed
- Other

- ◊ Negative Pressure Dressing

Out of Office Message Center in PowerChart

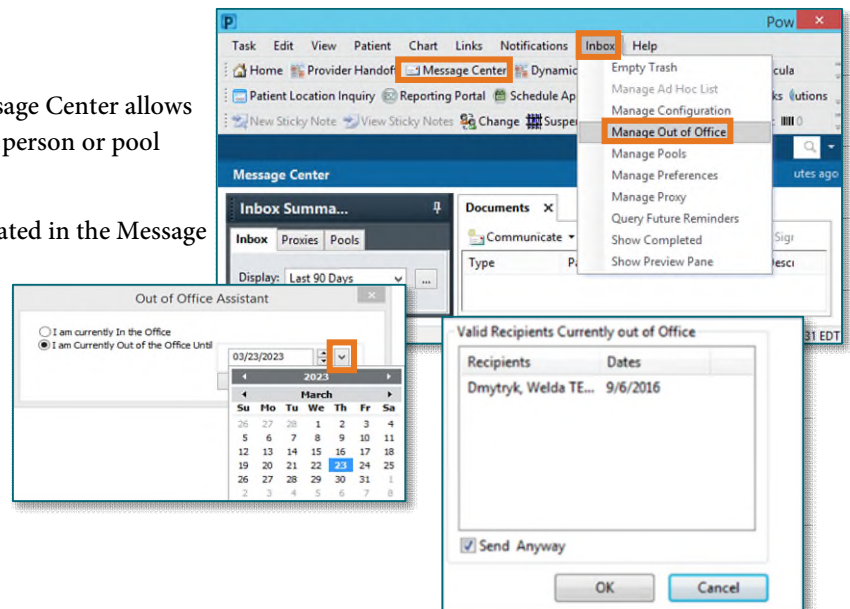

Going away for a while?

Setting up an "out of office" alert in Message Center allows others to redirect messages to a different person or pool while you are away.

The **Manage Out of Office** feature is located in the Message Center **Inbox** dropdown menu.

Click [here](#) for more information.

The screenshots show the PowerChart interface. The top screenshot shows the 'Message Center' dropdown menu with 'Manage Out of Office' highlighted. The middle screenshot shows the 'Out of Office Assistant' dialog box with a calendar for March 2023. The bottom screenshot shows the 'Valid Recipients Currently out of Office' dialog box with a list of recipients and dates.
