Primary Care Quality Measures and Recommendations Guide

The **Primary Care Quality Measures and Recommendations Guide** is accessible in three locations: **eCoach**, **Clinical Links**, and **Quick Links**. The handbook is a robust collection of tips and best practice workflows for clinical support staff and providers for meeting quality measures to provide high quality care that was published in Quick Links in September.

New Discern Alert for Completed Orders

A new discern alert will warn users when they are attempting to delete a completed order. The alert assists in preventing the financial implications associated with deleting a completed order.

Discern: Testing, Bamboozle (2 o	of 2)	×
Serner Cerner	Completed Order Alert	
	ete an order that has already been completed. This has billing quire patient reimbursement. Are you sure you want to delete	~

Krames Patient Education

An issue was identified when converting education to Spanish language after the recent Krames Patient Education update. As part of the update, a handful of educational templates do not display Spanish language when specifically indicated.

The templates reported to be affected:

- Colorectal Cancer: Surgery
- Colorectal Cancer: Treatment Choices
- Consistent Vitamin K Diet for Warfarin Use
- Nerve Blocks
- Therapeutic Pain Blocks

Oracle Cerner is aware of the issue and is actively working	
on a resolution.

Sending Patient Examples to Clinical Informatics

DO NOT forward items to a member of Clinical Informatics through the patient chart as it remains part of the medical record and is not directly related to the patient's care or condition.

When a concern is identified related to documentation, refills, phone messages, results, etc., place a ticket by calling the Help Desk at 207-973-7728 (toll free 1-888-827-7728) or through the Self-Service Portal via the NLH Intranet page.

For CI education materials or previous newsletters, please visit the CI Education portal at <u>http://ci.emhs.org/</u>
