Volume 1, Issue 72   **May 2023**
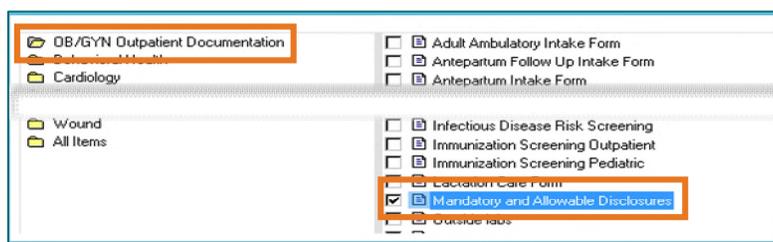

Mandatory and Allowable Disclosure Form

The Mandatory and Allowable Disclosure PowerForm has been added to the OB/GYN Outpatient Documentation AdHoc folder. Please click here for more information on the workflow for this form.

Duplicating a Public Auto Text Phrase to Personal

Reminder: Duplicating public auto text phrases to personal auto text phrases can make creation easier. Creating personal auto text phrases helps avoid entering recurring information every time thus saving time.

Example: To avoid entering referring provider name, address, and fax number on each QuitLink referral, duplicate, edit, and save a personal version of /demographics public auto text phrase.

NOTE: **The recommended best practice for creating personal auto texts is to begin them with a (.). To create your own personal menus; however, using a (/) will save your personal version to the auto text of the same name, allowing you to customize auto text that appear in note or message templates with a personalized text. Be careful because in long menus such as /labs you may have trouble finding your personal auto text among all the others.**

Click here for more information about auto text.

Code Status Modifications

INSTRUCTIONS

CODE STATUS VS. TREATMENT RESTRICTIONS

1. Code Status and Treatment Restrictions are provider orders for two SEPARATE situations.
2. Code Status order detail applies ONLY to patients IN cardiopulmonary arrest.
3. Treatment Restrictions order detail applies ONLY to patients who are NOT in cardiopulmonary arrest

CODE STATUS
This section must be completed and ONLY applies when a patient is in cardiopulmonary arrest. Check only one code status category

- Attempt Resuscitation/Full Treatment – Patient is a full code and resuscitation should be attempted.
- DNAR (Do Not Attempt Resuscitation)/Full Treatment – No CPR. Attempt to sustain life by all medically effective means.
- DNAR/Selective Treatment Restrictions – No CPR. Enter any Treatment Restrictions the patient may have chosen.
- DNAR/Comfort- Focused Treatments – No CPR. Maximize comfort through symptom management and allow natural death.

First bullet – No change

Second bullet – DNAR (Do Not Attempt Resuscitation/Full treatment- No chest compressions or intubation in the setting of cardiopulmonary arrest. Attempt to sustain life by all medically effective means, **including intubation in the setting of respiratory failure outside of cardiopulmonary arrest**.

Third bullet – DNAR/ Selective Treatment Restrictions – No chest compressions or intubation in the setting of cardiopulmonary arrest. Attempt to sustain life by all medically effective means **except** those identified by the patient or decision maker. (**Example: No endotracheal intubation**)

Fourth bullet – No chest compressions or intubation in setting of cardiopulmonary arrest. Maximize comfort through symptom management and allow natural death.

Scales and Assessments Score Update

Opioid Score has been added to the Scales and Assessments component to allow providers to easily view this score when questions have been completed in PowerForms.

Results Review Updates

Abnormal Results

All flowsheets display the same coloring for **Low**, **High**, and **Critical Results**.

- **Critical** results display in red with an exclamation preceding the result.
- **High** results display in orange and will the letter H preceding the result.
- **Low** results display in blue with the letter L preceding the result.

Search Criteria

When using **Change Search Criteria,** all flowsheets now have the **Number of results** limited to 1000 to avoid extended load times of the flowsheets.
