

Rapid COVID POC Testing

Rapid COVID POC testing is available for Ambulatory and Walk-In-Care locations. The Rapid COVID POC U0002 order can be placed and results documented on the corresponding PowerForm which posts results to the patient's banner bar.

Clinical team members may begin POC testing once training has been completed and competency documented for each performing member.

All **positive** results must be reported to the Maine CDC within 24 hours via the **REDCap Portal**.

COVID-19 test kits can be ordered through **Infor** using item **#545638**.

For more information, see the [communication](#) that was sent on September 1, 2023.

Primary Care Quality Measures & Recommendations	1

HealthInfoNet (HIN)

Health InfoNet is a Maine specific website which hosts medical information submitted by participating hospitals, provider offices and labs. Staff can connect to a patient's Health InfoNet record from within their NLH medical record. If a patient has a duplicate record within HIN, you must contact HIN to help remedy the issue.

Click [here](#) for more information on HIN and the other Health Information Exchange databases.

Primary Care Quality Measures & Recommendations Guide

Clinical Informatics and CDS collaborated with providers and quality staff to create the **Primary Care Quality Measures & Recommendations Guide** located in Quick Links. The guide can be used by any practice that manages quality measures and/or recommendations. The guide can be saved to My Quick Links by clicking the (+) next to the title.
