

Workflow MPage components are a consolidated, interactive view of patient information that allows staff a review of real-time data. Historically, Summary MPage components have been available to view information as well; however, some of them will be retired and the workflow MPage components should be used.

Consolidated Problems

The Consolidated Problems summary component will be retired from summary MPages. Staff are encouraged to follow the recommended workflows to associate This Visit and Chronic problems for a patient.

➤ Recommended Workflow:

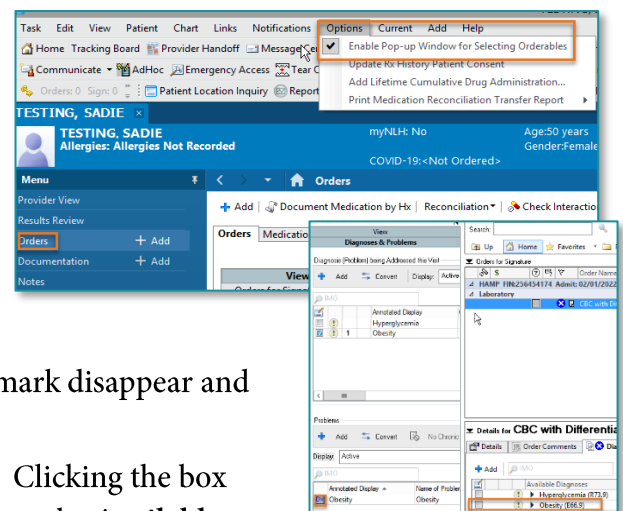

- Review and update the Problem List using the **Problem List** component on your Workflow MPage.
 - Click [here](#) for more information on the Problem List component.

Priority	Problem Name	Code	Onset	Classification	Actions
1	Diabetes type I	E10.9 (ICD-10-CM)	MAY 18, 2022	Medical	<input type="button" value="This Visit"/> <input type="button" value="Chronic"/> <input type="button" value="Resolve"/>
▶ Resolved Chronic Problems					
▶ All previous This Visit problems					

- Problems & Diagnosis** section being enabled within the order profile allows end users to add diagnoses from the patient's Problem List when placing orders without having to use the diagnosis search function.

- To Enable this feature:
 - Navigate to the **Menu** and click **Orders**.
 - Locate and click **Options** in the toolbar.
 - Once open, click the checkmark next to: **Enable Pop-up Windows for Selecting Orderables** to make the checkmark disappear and enable **Problems & Diagnosis** section.
- From the orders pane **Problems** are now visible. Clicking the box next to any problem on the list adds the problem to the **Available Diagnoses** options.

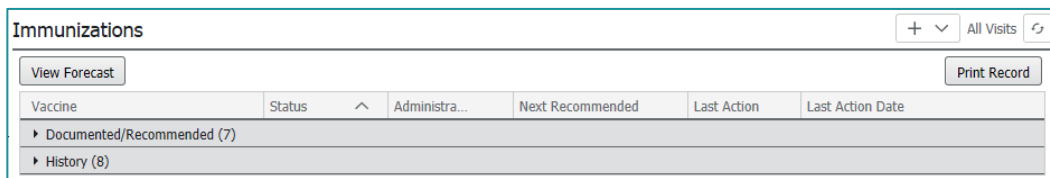

Immunizations

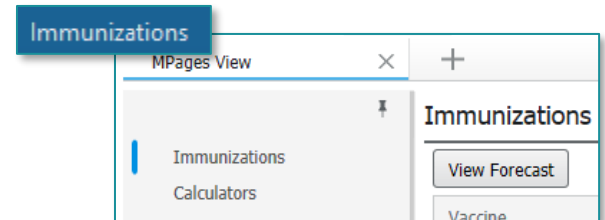

The **Immunization summary component** will be retired from summary MPages. Staff are encouraged to review, document historical, and correct immunizations from the Immunization component or menu.

➤ Recommended Workflows:

- Review Immunizations from the **Immunization** component on your workflow MPage.
 - Click [here](#) for more information on how to document historical immunizations.

- Select **Immunizations** from the table of contents to review, document, or correct immunizations within the workflow MPage component.

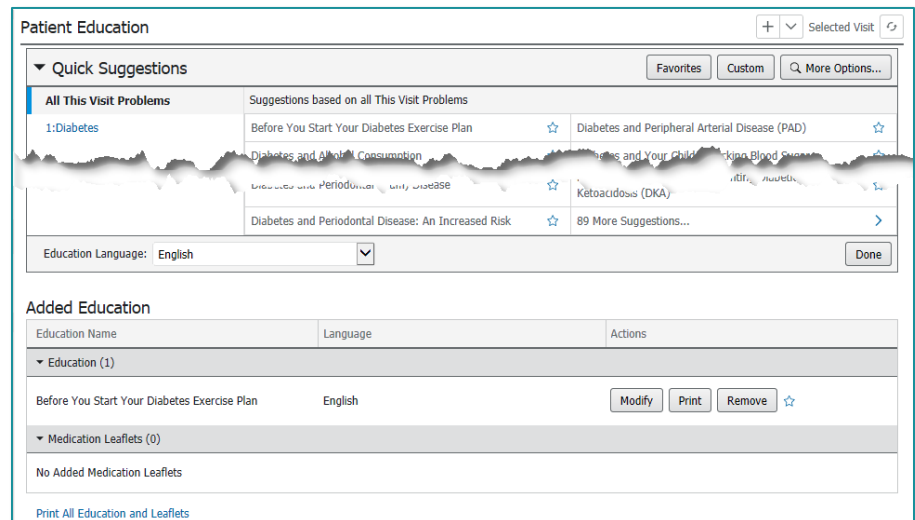

Patient Education

The **Patient Education summary component** will be retired from summary MPages. Staff are encouraged to use the patient education component to add, modify, remove, and review patient education specific to the current encounter for a patient.

➤ Recommended Workflows:

- Add and Review patient education from the **Patient Education** component on your workflow MPage.
 - As a reminder, suggested patient education will display based on the problems identified for a patient for this visit.

- Education can also be reviewed from the **Documentation** link in the PowerChart Menu.
