# IPAD/ZAGG KEYBOARD SHORTCUTS

fn + down arrow	Turns on keyboard backlight	
fn + right arrow	Changes the color of the backlight	

**NOTE:** Set your iPad to default to your keyboard if you prefer. This avoids the on-screen touch keyboard from popping up every time to place your cursor to start writing. The ZAGG keyboard does have a sleep mode. Tap a key to wake it up before typing.

Settings > General > Keyboard > Toggle Off “Slide on Floating Keyboard to Type”.
