

On August 25, 2020, The Goals and Education section of the Nutrition Assessment and Plan will be updated to document time approved, used, and time remaining for patients receiving Ambulatory Nutrition Services. This addition will reduce the number of denials due to overages of approved time as well provide the ability to electronically track Nutrition Services time for reporting purposes. Educators will be responsible for adding time approved and time used to the Powerform.

### Initial Session Nutrition Time Tracking

Documenting Approved Time and Time Used:

- STEP 1:** Click **Nutrition Assessment and Plan Form**.
- STEP 2:** Scroll to the **Goals/Education Section** and note the **Ambulatory Nutrition and Assessment Plan Time** below Education.
- STEP 3:** Enter the **Time Approved in Minutes** and the amount of time spent with patient in the **Time Used in Minutes** field.
- The **Time Remaining** will Auto-Calculate.

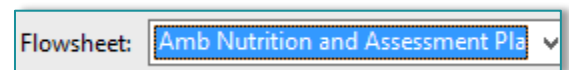

The screenshot shows a navigation bar with a checked box and the text "Nutrition Assessment and Plan Form". Below it is a blue button labeled "Goals/Education". The main content area is titled "Ambulatory Nutrition and Assessment" and contains a table with the following structure:

Sessions	Time Approved in Minutes	Time Used in Minutes
Initial Session	<input type="text" value="Minutes"/>	<input type="text" value="Minutes"/>

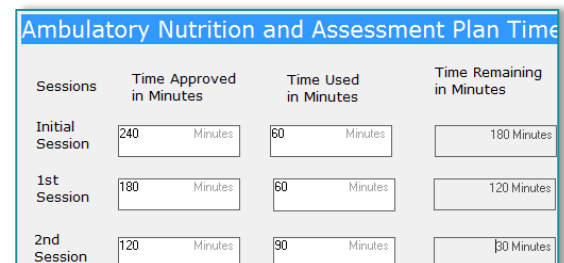

### Subsequent Sessions Time Tracking

Educators will first need to locate the Time Remaining on the Amb Nutrition and Assessment Plan Time flowsheet located in Results Review.

- STEP 1:** Enter **Time Remaining** from previous visit into **Time Approved in Minutes** field.
- STEP 2:** Enter Time spent for visit in **Time Used in Minutes** Field.

The screenshot shows a dropdown menu labeled "Flowsheet:" with the selected option "Amb Nutrition and Assessment Pla" and a downward arrow.

Sessions	Time Approved in Minutes	Time Used in Minutes	Time Remaining in Minutes
Initial Session	<input type="text" value="240"/> Minutes	<input type="text" value="60"/> Minutes	<input type="text" value="180"/> Minutes
1st Session	<input type="text" value="180"/> Minutes	<input type="text" value="60"/> Minutes	<input type="text" value="120"/> Minutes
2nd Session	<input type="text" value="120"/> Minutes	<input type="text" value="90"/> Minutes	<input type="text" value="30"/> Minutes
