

Patients receiving allergy injections within a primary care practice must document on the Allergy Injection form located within AdHoc.

Allergy Injections

Patients receiving allergy injections within their primary care practice, must be documented on the allergy injection form within AdHoc. This task is not a medication and cannot be documented in the medication administration wizard or single patient task list.

STEP 1: From the patient chart, click  in the upper toolbar.

STEP 2: Click the Ambulatory folder.

- Click the Allergy/Asthma folder.

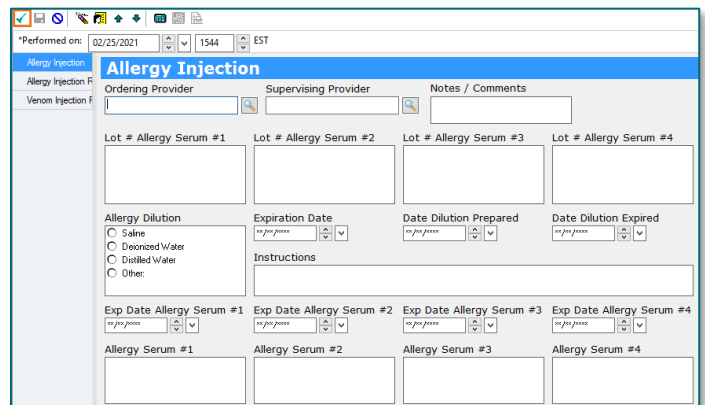

STEP 3: Check the box beside Allergy Injection.

- Click Chart.

STEP 4: Enter Ordering Provider, Lot #, Allergy Dilution, Exp Date, Allergy Serum, and any other pertinent information.

The screenshot shows the 'Allergy Injection' form with the following fields:

- Ordering Provider: [Text Field]
- Supervising Provider: [Text Field]
- Notes / Comments: [Text Field]
- Lot # Allergy Serum #1: [Text Field]
- Lot # Allergy Serum #2: [Text Field]
- Lot # Allergy Serum #3: [Text Field]
- Lot # Allergy Serum #4: [Text Field]
- Allergy Dilution:
 - Saline
 - Deionized Water
 - Distilled Water
 - Other: [Text Field]
- Expiration Date: [Date Picker]
- Date Dilution Prepared: [Date Picker]
- Date Dilution Expired: [Date Picker]
- Instructions: [Text Field]
- Exp Date Allergy Serum #1: [Date Picker]
- Exp Date Allergy Serum #2: [Date Picker]
