

Importing Immunization Records using Immunization Registry Import reduces clerical errors, saves time, and avoids duplication. The tool is used to pull the patient's recorded vaccines and forecasted immunizations from the Maine Immunization Information System (ImmPact) registry into the patient's Cerner record.

Immunization Importing

STEP 1: From Workflow MPage, select **Immunizations**.

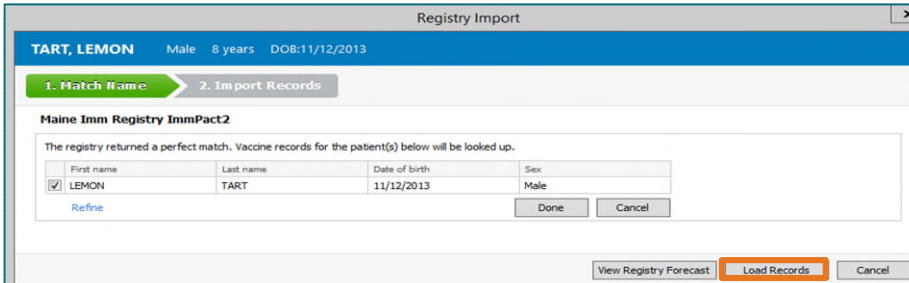

STEP 2: Select **Import**.

Vaccine	Status	Administrations	Next Recommended	Last Action	Last Action Date
Documented/Recommended (9)					
Hepatitis B	Overdue	--	Today	--	--
Td/Tdap	Overdue	--	Today	--	--
Measles, Mumps, Rubella (MMR)	Overdue	--	Today	--	--
Varicella	Overdue	--	Today	--	--
Human Papillomavirus (HPV)	Overdue	--	Today	--	--
COVID-19	Overdue	2	Today	Administered	JAN 07, 2022 (21yrs 9m)
Influenza	In Range	--	Today - JUN 30, 2023	--	--
Pneumococcal Polysaccharide (PPSV)	--	--	--	--	--
Zoster	--	--	MAR 18, 2050	--	--
History (6)					
Rotavirus	Aged Out	--	--	--	--
Haemophilus Influenzae Type B (Hib)	Aged Out	--	--	--	--
Pneumococcal Conjugate (PCV)	Aged Out	--	--	--	--
Polio	Aged Out	--	--	--	--
Hepatitis A	Aged Out	--	--	--	--
Meningococcal (MCV)	Aged Out	--	--	--	--

STEP 3: **Registry Import** is displayed, defaulting to the green highlighted tab **1. Match Name Tab**. Verify patient's name and demographics and select patient from search results. Select **Load Records** to retrieve Immunization Records.

- Recorded vaccines from the registry are displayed based on an initial search of the patient's first name, last name, middle name, sex, and date of birth. This occurs when there is a one -to-one match. If no matches are found or there are several matches, you may refine the search criteria. If multiple records with the same demographic information are found for the same patient (potential duplicates), you may select multiple persons to retrieve immunization records for the patient.

Registry Import

TART, LEMON Male 8 years DOB: 11/12/2013

1. Match Name 2. Import Records

Maine Imm Registry ImmPact2

The registry returned a perfect match. Vaccine records for the patient(s) below will be looked up.

First name	Last name	Date of birth	Sex
<input checked="" type="checkbox"/> LEMON	TART	11/12/2013	Male

Refine Done Cancel

View Registry Forecast Load Records Cancel

STEP 4: Select arrow in the column heading to move all records from the Registry to the patient's Cerner record or select specific arrows corresponding with the record that you would like to import.

NOTE: If one is selected by mistake and needs to be removed, select the back arrow.

NOTE: If a vaccine record for the same date already exists in Cerner, the arrow is not displayed on the row.

STEP 5: Select **Submit** to import all selected vaccines to the Cerner database. These vaccines are now displayed in **Immunizations**.

Administration date	Selected registry	Product in selected registry	Product on patient's chart
COVID-19			
Jan 03, 2021	Maine Imm Registry ImmPact2	SARS-CoV2 mRNA-1273 vaccine(Moderna)	
Jan 13, 2021			SARS-CoV2 mRNA-1273 vaccine(Moderna)
Mar 31, 2021	Maine Imm Registry ImmPact2	SARS-CoV2 mRNA-1273 vaccine(Moderna)	SARS-CoV2 mRNA-1273 vaccine(Moderna)
Jun 13, 2021	Maine Imm Registry ImmPact2	SARS-CoV2 mRNA-1273 vaccine(Moderna)	SARS-CoV2 mRNA-1273 vaccine(Moderna)
Human Papillomavirus (HPV)			
Jun 14, 2022			human papillomavirus vaccine
Jun 15, 2022	Maine Imm Registry ImmPact2	human papillomavirus vaccine	
Pneumococcal Conjugate (PCV)			
Oct 15, 2021	Maine Imm Registry ImmPact2	pneumococcal 13-valent conjugate vaccine	
Pneumococcal Polysaccharide (PPSV)			
May 25, 2021	Maine Imm Registry ImmPact2	pneumococcal 23-valent vaccine	
Oct 15, 2021	Maine Imm Registry ImmPact2	pneumococcal 23-valent vaccine	pneumococcal 13-valent conjugate vaccine
Oct 24, 2021			pneumococcal 23-valent vaccine

NOTE: The name of the person who imports the data is in the Performed By element of the workflow Immunization component.
