

From the Women's Health View, the GYN Clinic MPage provides the components to document a postpartum visit.

## Postpartum Visit

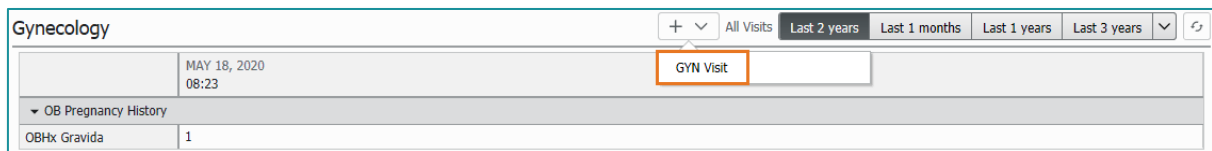

From the Ambulatory Organizer, navigate to the Women's Health View.

### ➤ GYN Clinic MPage

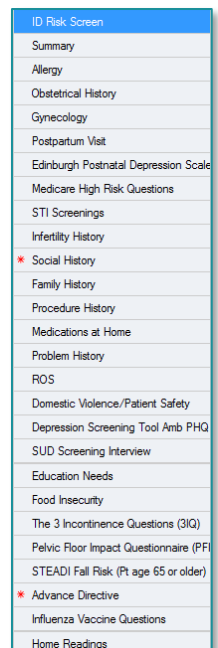

- **Chief Complaint**
  - Complete the **Chief Complaint** with the reason for today's visit and **Sign**.

- **Gynecology Component**
  - Click the drop-down component and select **GYN Visit**.

- **GYN Visit**
  - **ID Risk Screen:** Answer all questions with a red asterisk and other questions as appropriate.
  - **Summary:** In this section, complete the vital signs and other information as appropriate. **Patient Communication Preference** is required.
  - **Allergy:** Review and update allergies. Mark as **Reviewed** when complete.
  - **OB/GYN History:** Review the **Pregnancy History** to ensure the delivery has been recorded. If the patient delivered at an NLH facility, the pregnancy would have been closed at the hospital and this should be reflected. If they delivered outside of NLH, the pregnancy would need to be closed and then the G/P would reflect the latest delivery.
  - **Gynecology:** Review and update as appropriate, including contraception history.
  - **Postpartum Visit:** In this section, document how the patient has been doing since the delivery of her newborn.

- **Edinburgh Postnatal Depression Scale:** Complete all the questions to calculate the score. This will display on the **Scales and Assessments** component.
  - **STI Screenings:** Review and update as appropriate.
  - **Infertility History:** Review and update as appropriate.
  - **Social History:** Review and update as appropriate. Sections to review are: Tobacco, Electronic Cigarette/Vaping, Alcohol, Substance Abuse, and Abuse/Neglect.
  - **Family History:** Review and update as appropriate.
  - **Procedure History:** Review and update as appropriate. If the patient had a c-section or tubal, review to see if this was added during the hospitalization.
  - **Medications at Home:** Select Documentation by History and review and update the home medications. Review the patient's preferred pharmacy and update as appropriate. Select **Done** when complete.
  - **Problem history:** Review and update as appropriate.
  - **Domestic Violence/Patient Safety:** Review and update as appropriate.
  - **Depression Screening:** Complete the PHQ-2 and depending on the response, complete the PHQ-9.
  - **Food Insecurity:** Review and complete as appropriate.
  - **Advance Directive:** Complete the required question with the red asterisk.
  - **Influenza Vaccine Questions:** Complete during the appropriate season.
  - **Sign** when completed.
- **Allergies**
    - From the **Allergies** component, click **Complete Reconciliation**.

Reconciliation Status: **Incomplete** [Complete Reconciliation](#)

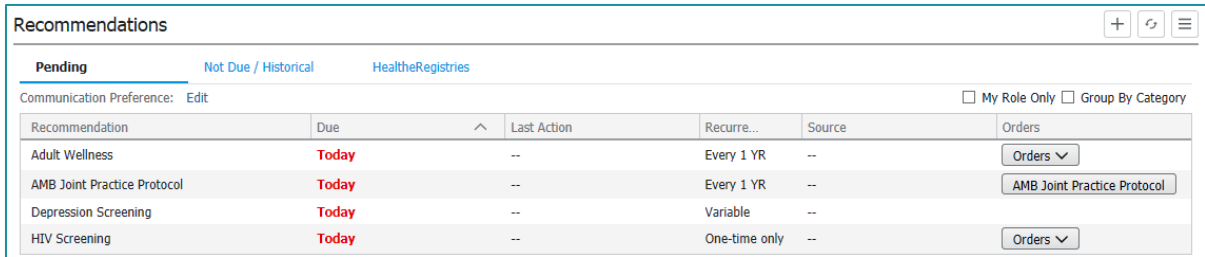

- **Immunizations**

- Review the **Immunizations** component and if there are immunizations due, place the order for the immunizations.

Vaccine	Status	Administr...	Next Recommended	Last Action	Last Action Date
▶ Documented/Recommended (6)					
▶ History (9)					

- **Recommendations**

- Review the **Recommendations** and address as appropriate.

The screenshot shows a web interface titled "Recommendations". It has tabs for "Pending", "Not Due / Historical", and "HealthRegistries". Below the tabs, there is a "Communication Preference: Edit" link and checkboxes for "My Role Only" and "Group By Category". The main content is a table with the following columns: Recommendation, Due, Last Action, Recurre..., Source, and Orders.

Recommendation	Due	Last Action	Recurre...	Source	Orders
Adult Wellness	Today	--	Every 1 YR	--	Orders
AMB Joint Practice Protocol	Today	--	Every 1 YR	--	AMB Joint Practice Protocol
Depression Screening	Today	--	Variable	--	Orders
HIV Screening	Today	--	One-time only	--	Orders

- **Single Patient Task List**

- Review the **Single Patient Task List** after the provider has seen the patient and placed orders to view and complete any outstanding tasks.
