

The CareView Dashboard is an interactive visual management tool used during discharge progression huddles to identify barriers to discharge. Research shows the longer a patient is hospitalized, the more likely they are to develop a hospital-acquired condition. Identifying barriers and assigning responsibility for resolution supports the high-quality care provided at Northern Light member organizations and promotes timely discharge.

### CareView Dashboard Access

➤ To log into the CareView Dashboard on the nursing unit monitors, staff will utilize the keyboard to manually enter generic credentials.

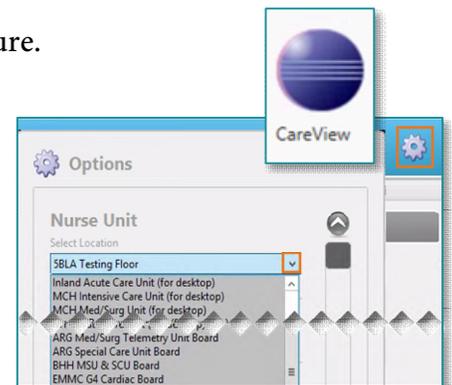

- CareAware iCommand Login:
  - **Environment:** PROD\_US
  - **Tenant:** EAST\_ME\_P108
- iBus Cloud Login:
  - **Username:** CVTB
  - **Password:** CVTB2019
  - Select **Remember Username**.

- Users will only need to enter the password in the future.

➤ To access the CareView Dashboard from a personal workstation, click the **CareView** icon from the Cerner Storefront, and enter your Cerner credentials.

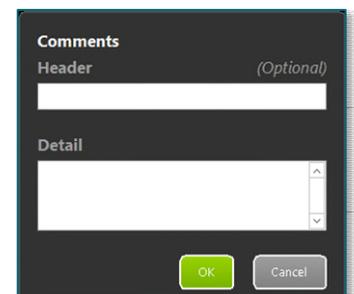

- Once the solution is open, users can select the gear icon to display different units for review.

### Dashboard Overview

➤ On the right-side of the display, various tabs are available.

- **Comments:** Comments can be entered to share information with staff that is appropriate to unit activities.
- **Filter:** Used to identify patients based on selected Milestones, Patient Attributes, or Indicators.
- **Modify:** Allows for users to select a specific patient and modify applicable barriers.
- **Reserved:** This tab provides information for unit-specific patient transfers and PreAdmit encounters.

- **Room:** Color coding will pull in from Capacity Management.
- **Patient:** Only initials will display for HIPAA compliance.
- **Status, Placement, Attending, and Service:** The information pulls in from Registration documentation.

- **RN and CNA:** Names of assigned staff in Clairvia will display.
- **Admit Date and LOS:** Display based on Registration information.
- **ADOD:** Date will display documentation entered by Care Management or Staff Nurse.

**NOTE:** To view more information on ADOD documentation, view the flyer [here](#).

- **Acuity:** Aligns with what is displayed on CareCompass and in Clairvia and is based on documentation.
- **DBN:** Manual assignment to display an icon for patients expected to discharge by noon.
- **R/Y/G:** Indicates discharge readiness, **Red** - two days; **Yellow** - one day; **Green** - ready to discharge.
- **Barriers:** Manually assigned by using the touchscreen on the wall mounted monitors or using the mouse on a desktop device during huddles.

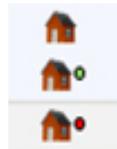

- Click the **Modify** tab, select the **Patient**, and choose the applicable **Barriers**.

**Attributes:** Patient attributes align with Capacity Management icons.

➤ **Milestones:** Icons related to discharge progression populate from Capacity Management.

- *Anticipated* – no dot
  - The discharge house milestone is applied in for patients who are anticipated to discharge.
- *In progress* – green dot
  - When a discharge order has been placed by the provider, the discharge house will appear with a green dot.
- *Completed* – red dot
  - A red dot will appear when the discharge is marked as completed in Capacity Management.

**NOTE:** To view more information related to the Capacity Management Discharge Process, see this [flyer](#).
