

The Nursing Discharge Process takes place within the Nursing Discharge MPage.

Gap Checking

- Certain Discharge components have a **red asterisk*** in front of them.
- When all the required documentation has been completed for the patient, a green checkmark will replace the red asterisk.
- The patient should not be discharged until all requirements have been met.
- Some of the requirements will need to be completed by the provider.
- Refer to the **Electronic Clinical Quality Measures** flyer for Quality Measures education.

✓ Follow Up
* Discharge Documentation (0)
✓ Home Medications (3)
✓ IV Stop Times Lines/Tubes/Drains
✓ Orders (42) Quality Measures (0)
* Patient Education

What satisfies the components?

- **Orders** – to satisfy this requirement a **Discharge Order** needs to be placed by the provider.
 - When a green checkmark displays, the nurse knows that a discharge order has been placed on the patient order profile.
 - The Discharge Order fires two tasks to CareCompass:
 - **Educate Patient on Medication Adherence topics/problems.**
 - **Provide Patient with Condition Specific Education.**
- **IV Stop Times** – to satisfy this requirement, document **IV stop times**.

STEP 1: Click **Document Stop Times**.

STEP 2: Select the infusion(s) needing stop times documented.

STEP 3: **Infusion Billing** opens for IV stop time documentation.

STEP 4: Verify End time and volume infused is correct.

- **Patient Education** – to satisfy this requirement, at least one **education topic** needs to be added.
 - One of the suggested topics should be selected to meet CMS requirements.
 - The language must be changed before selecting the education topic by using the dropdown.

NOTE: Not all education topics are available in each of the languages.

STEP 1: Click the education topic to add it to the patient's chart.

STEP 2: Click **More Options** or the + sign to the right of the Patient Education title bar to search for additional education topics.

STEP 3: Click the star to add to **Favorites**. The star will turn blue, and the topic will be available when the **Favorites** button is selected.

STEP 4: Click the education topic. There is no need to click enter.

STEP 5: The education can be **Modified, Printed, or Removed** by selecting the applicable button.

STEP 6: Click **Full Assessment** to open the Adult Education iView Band and document the patient's response to the education provided.

NOTE: Only the Education topic will print on the Patient Discharge Instructions. Education topics are to be printed and given to the patient.

- **Home Medications** – to satisfy this requirement, **Discharge Medication Reconciliation** must be completed by the provider.
- **Follow Up** – to satisfy this requirement, at least one **Follow Up** appointment must be documented.

- Using **Quick Picks**
 - The Patient's PCP will automatically display in the Quick Picks for easy selection.
 - Use the **Search** box to locate providers that are not in Quick Picks or Favorites.
 - Once a provider is selected, click **Modify**.
 - Click the + sign, it will take you to Krames appointment options.
 - Using the dropdown, select the appointment timeframe.
 - Select the telephone number and provider's address.

- Select from the **Predefined Comments** or free text in a comment.
- Click **Save**.

NOTE: It is best practice to schedule the appointment for the patient prior to discharge.

Discharge Documentation

- The **Nursing Discharge Summary Form** is completed from the **Discharge Documentation** component.
 - Click the dropdown arrow to the right of the Discharge Documentation title and select **Nursing Discharge Summary Form**.
 - Click the + sign next to the dropdown to access the **Adhoc folder** to document in other discharge forms such as the Expiration form.

- **Nursing Discharge Summary form consists of three sections.**
 - Document where the patient was discharged, discharge mode, and transportation used, as well as any special equipment or services that the patient went home with.
 - Vital signs documentation.

Printing the Patient Discharge Instructions

- Click **Patient Discharge Instructions** at the bottom of the component list to open the **Patient Discharge Instructions**.
- If all the requirements are not met when the **Patient Discharge Instructions** are opened, the nurse needs to select an override reason from the dropdown for each requirement that is not met.
- The override reason entered displays when the **Patient Discharge Instructions** are opened again if the requirement remains unmet.
- Hover next to the title of each of the sections in the **Patient Discharge Instructions** to reveal the icons.
 - The three icons from left to right: refresh the section, free text additional information, and to remove the section.

- Removing a blank section cleans up and customizes the **Patient Discharge Instructions** for the patient.
- Instructions from the provider on activity limitations, wound care, etc., can be free texted in the **What to do next** section by hovering and clicking the free text icon.
- Medications

What to do next

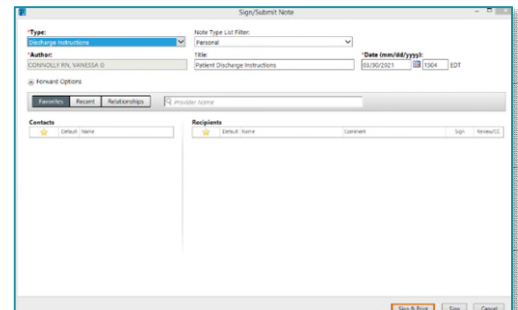

- Two types of medication lists may exist for the patient.

- Home medications print with a page break so the patient can keep a list of medications to show to providers.

Medications					
	What	How Much	When	Instructions	Next Dose
Unchanged	albuterol (Ventolin HFA 90 mcg/ inh inhalation aerosol)	2 puff(s) Inhalation	FOUR TIMES DAILY		

- A discharge medication list appears where nursing will enter the next dose information as well as any special instructions for the patient.
- Hover in the **When, Instructions** and **Next Dose** boxes to free text medication administration details.

- Click the **Save** button to save any information that has been free texted into the **Patient Discharge Instructions**.
- Click **Sign/Submit** to sign the form and open the **Sign/Submit** box.
- Once the **Sign/Submit Note** box populates, click **Sign & Print** to print the instructions.
- Review the Patient Discharge Instructions with Patient.

Care Compass Discharge Tasks

- Educate Patient on Medication Adherence topics/problems.
- Provide Patient with Condition Specific Education.
- From CareCompass click **education topics** to select them.
 - Click **Document**.
 - From Activity View document the Medication Education and sign.
- Once documentation is complete on both the tasks, they are no longer be viewed in CareCompass.
