

---

Bridge Breast Milk Management allows for an accurate snapshot of the status of maternal and donor milk for the newborn. Within Bridge, the documentation of the sharing of sibling milk can occur.

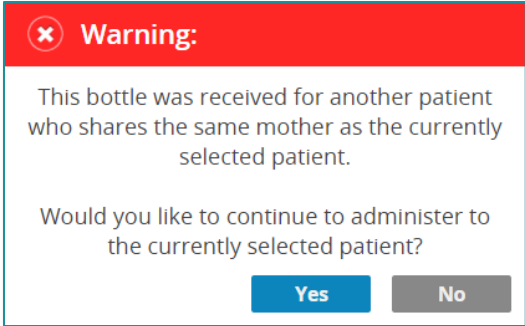

---

### Sharing Sibling Milk

- STEP 1:** Scan the patient's wristband.
- STEP 2:** Select **Administer Bottles**.
- STEP 3:** Scan bottle barcode for sibling's milk.
- STEP 4:** The sibling warning will appear on the screen.
- STEP 5:** Are siblings allowed to share milk?
- Select **Yes**, if allowed.
  - Select **Confirm** to administer the milk.
  - If more bottles are to be given, address any pop-ups and administer the milk.
  - Select **No**, if not allowed.
- STEP 6:** Select **Exit** to return to the patient's chart.

Administer Bottles

**Warning:**

This bottle was received for another patient who shares the same mother as the currently selected patient.

Would you like to continue to administer to the currently selected patient?

Yes

No
