

The optimization of the Adult, Adult Crit Care, Rehab, Periop, Pediatric, and PICU Quick View bands is a result of the work by the NLH Nursing Informatics Stakeholder Council. These changes improve the documentation workflow by eliminating duplication, streamlining information, and promoting efficiency.

Quick View Changes

➤ New section – Post Skin Response

- This new section allows nursing to document the findings identified during a SKIN Response in member organizations using this process to evaluate the presence of a potential pressure injury.
- This addition DOES NOT replace documentation of the wound/pressure injury in the **Incision/Wound/Skin** dynamic group.

Post Skin Response	
SKIN Response	Yes
Reason for response	
Manager present	
Provider present	
Wound RN present	
Patient included	
Location	
Description	
Recommendation	

➤ Caregiver Rounding

- **Patient Position** has been removed and is now located in the **Activity** subsection of **Activities and Daily Living**.

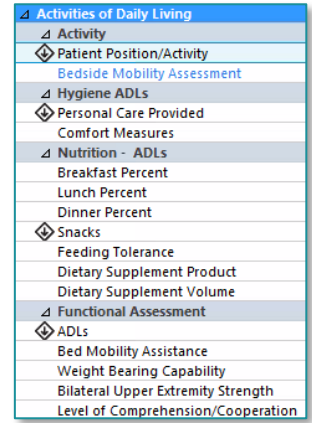

➤ Post Fall Evaluation has been moved from the System Assessments band to the Quick View bands.

➤ Activities of Daily Living

- **Activity**
 - Documentation for patient activity will open based on the selection made in **Patient Position/Activity**.

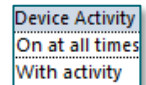

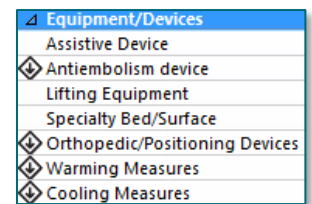

Patient Position/Activity
<input type="checkbox"/> Ambulating
<input type="checkbox"/> Up to
<input type="checkbox"/> Position/Reposition
<input type="checkbox"/> Dangled
<input type="checkbox"/> Bedrest
<input type="checkbox"/> Head of bed elevated
<input type="checkbox"/> Restraint Alternative - Non-Violent
<input type="checkbox"/> Returned to bed
<input type="checkbox"/> Rotational device

- **Hygiene ADLs**
 - **Comfort Measures** has been moved to this location from the Patient Care Measure section.
- **Nutrition ADLs**
 - Documenting a snack will open documentation fields for the Morning, Afternoon, and Evening Snack Percentage.
- **Functional Assessment** has been moved to the end as it is only documented at admission.
 - **Weight Bearing Capability, Bilateral upper Extremity Strength, and Level of Comprehension/Cooperation** has been moved from **Safe Patient Handling**.

➤ **Equipment/Devices**

- New name was formerly called Equipment.
- **Assistive Devices** moved to this location from Activity.
- **Orthopedic/Preventative Devices, Specialty Orthopedic Devices, and Positioning/Pressure Reducing Devices** have been combined and are found in **Orthopedic/Positioning Devices**.
 - Selecting an orthopedic device will open **Device Activity**.
 - When applicable, **Orthopedic Positioning Device Side** will open for documentation of laterality.

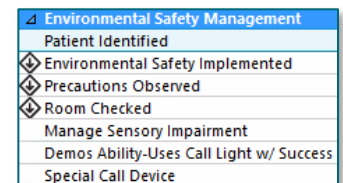

➤ **Environmental Safety Management**

- Documentation fields have a new order for better flow.

➤ **Ice/Warm Pack Application**

- Based on selection of Ice or Warm Pack, **Pack Barrier, Pack Time Interval, and Pack Patient Tolerance** will open.
- Based on the body location selected, **Pack Location Laterality** will open.

➤ **Provider Notification**

- Documentation fields will open once the **Provider Notification Date/Time** is documented.
