

Electronic Health Record Infection Prevention Reports

April 14, 2021

~ Reporting Portal ~

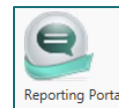

There are several reports available for Infection Preventionists. Many are examples are provided here, but several other reports are available in the Reporting Portal. The list has been divided into categories below. Use the table of contents to jump to the desired report for more details.

Table of Contents

Accessing Reporting Portal and Generating Reports.....	1
Line Lists	2
Device Reports.....	4
CMS Validation Reports.....	5
NHSN Device Denominator Reports.....	5
Healthcare Acquired Infection Reports.....	5
Health Dept Report.....	7

Organism Prevalence	8
Ventilator Associated Event Report.....	8

Accessing Reporting Portal and Generating Reports

- From the StoreFront or the Toolbar, IPs can access the Reporting Portal and generate reports.
- Click the **Star** icon to save as a favorite.

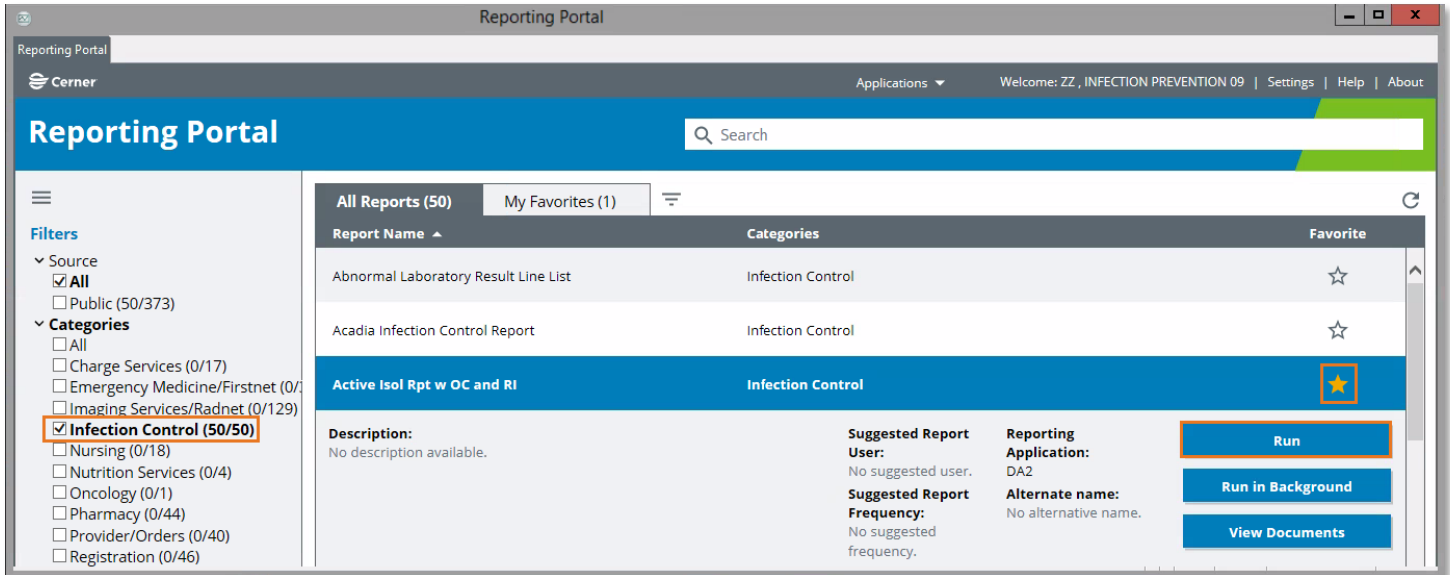

Pathways to Our Future

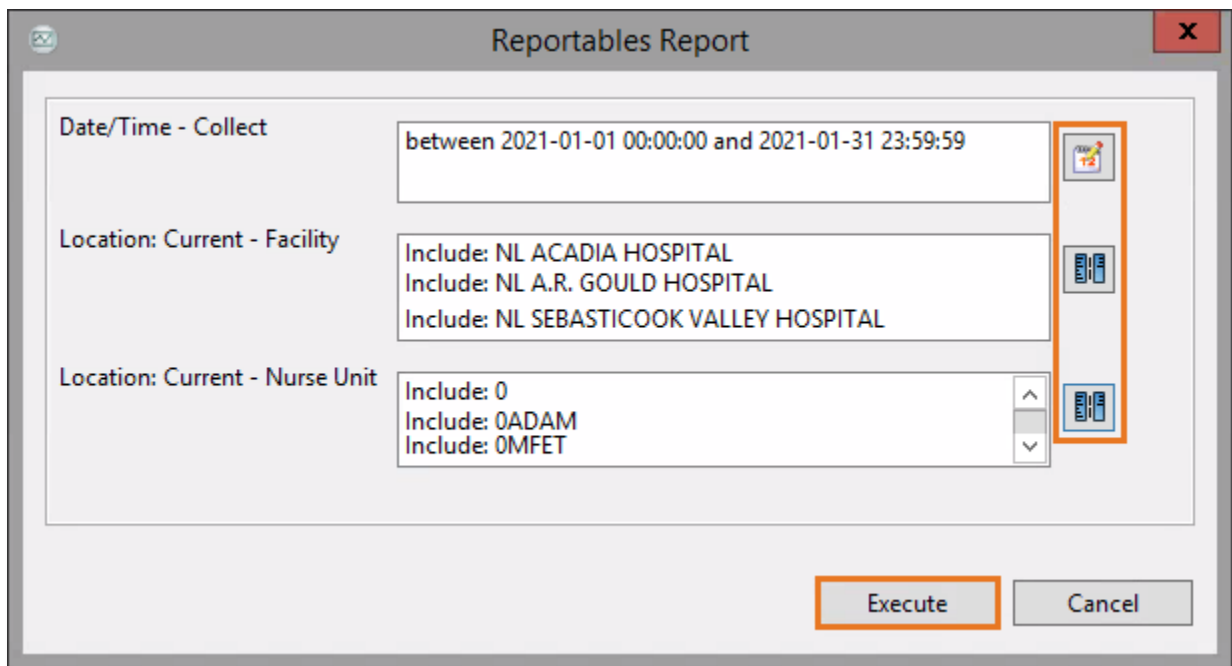

Infection Prevention Reports

April 14, 2021

- Click the **Infection Prevention** category to focus to pertinent report options.

- Click **Run** to generate the report and use the icons to the right of the parameter windows to enter desired information and click **Execute**.

Line Lists

A display of abnormal laboratory results associated with line placement during an identified time frame.

Pathways to Our Future

Infection Prevention Reports

April 14, 2021

- Isolation Report/ All events: can be scheduled to print a list of pt with order; all events would include admit date/time, start of isolation date/time, discontinuation date/time and reason for isolation

- MDRO Line List: provides all MDROs displayed on the ICP Worklist for a selected time period.
- Organism Line List: displays organisms from culture results for an identified time frame.
- Pos Neg Serology Result Line List: specific serology/fecal tests can be viewed by positive/negative result; can be used to report total number of tests performed and number of each result
- Reportables Report/ by Risk DT: generates a list of reportable conditions displayed on the ICP Worklist; DT will pull in Date/Time and can be used with Health Dept Report to validate all were reported.

NHSN Device Denominator Reports

Infection Preventionists can generate reports to examine denominator data for the purpose of HAI outcomes and reporting.

- NHSN Device Report ICU Other/ NICU/SCA: bed days, central line days, urinary cath days, vent days.
- NHSN Person ICU Device/ NICU/ SCA: pt name, unit, MRN, FIN will display when initial line start is documented, which starts the line count for NHSN requirement.

Healthcare Acquired Infection Reports

Patients who have Infection Confirmation Advisor documentation will appear on this report. IPs will be able to sort by specific HAIs for review.

Pathways to Our Future

Infection Prevention Reports

April 14, 2021

- HAI Advisor Detail: documented information regarding UTI, SSI, BSI, CAUTI, CLABSI and Title 17 Infections pulls in for IP review.
