

The Tube workflow ensures that patients receive the appropriate tube and tube care during their inpatient stay.

Entering Tube Insertion, Maintain Tube, and Remove Tube Orders

Providers have the ability to place tube orders which notifies nursing there is a Care Compass task.

- **Tube Insertion** – use order when a new Tube needs to be inserted.
 - Select the tube type from the **Tubes:** dropdown.
 - Complete all applicable fields and sign.
 - **Tube Insertion** task fires to Care Compass.
 - Nursing documents details of tube insertion in iView.
 - **Tube Care** task fires to Care Compass each shift.
- **Maintain Tube** – use order when a patient has an existing tube.
 - Select the tube type from the **Tubes:** dropdown.
 - Complete all applicable fields and sign.
 - **Maintain Tube** task fires to Care Compass.
- **Remove Tube** – use order when the Tube needs to be removed.
 - Select the tube type from the **Tubes:** dropdown.
 - Complete all applicable fields and sign.
 - **Remove Tube** task fires to Care Compass.
 - Once Task is completed the Tube order will auto-complete.

NOTE: If a tube order is cancelled, then the associated tube task is also cancelled from Care Compass.
