
The ASC Recovery and Discharge MPage are streamlined to quickly move the patient through the PACU and discharge phase.

ASC Recovery & Discharge MPage

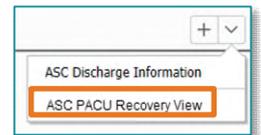

The process is completed on the **ASC Recovery and Discharge Workflow** MPage from Nurse View. All sections with a red * asterisks are required for completion.

NOTE: To add or delete a workflow MPage, click the "x" or "+" on the tab in Nurse View.

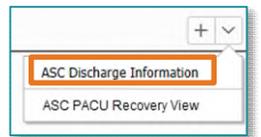

➤ Discharge Documentation

- Select **ASC PACU Recovery View** in the drop down to navigate to Interactive View and I&O.
 - Complete patient assessment and documentation.
 - To add a new navigation band, refer to [iView Band Setup \(northernlighthealth.org\)](http://iviewbandsetup.northernlighthealth.org).
- Select **ASC Discharge Information** to complete the discharge education and information form.

➤ New Order Entry

- Review and complete **Orders**.

➤ Documents

- The **Documents** component is available for the nurse to review notes, PowerForms, or any other documents prior to discharge.

➤ Diagnostics

- CV ECG and other diagnostic tests are viewable within this area.

➤ Problem List

- Review to determine if a **Problem** was added for **This Visit** for patient education purposes.

➤ Histories

- Review the **Histories** component, including **Implant History**, as well as pertinent information from the current procedure.

➤ Home Medications

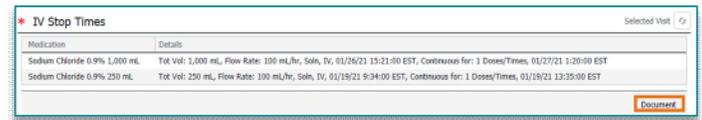

- If electronic **Medication** and **Discharge Reconciliation** has been completed, a green checkmark will appear indicating completion.
 - Upon discharge, **override is necessary** if reconciliation has not been completed.
-

➤ **Follow-Up**

- Review **Follow-Up** instructions to determine if they have been completed.
 - Currently, **Follow-Up** is completed on paper for review.

➤ **IV Stop Times**

- Review and Document appropriate **IV Stop Times**.
 - To complete, select **Document**.
 - Document the infusion end times.
 - Click **Sign**.

NOTE: IV Stop Times must be completed to determine the correct and accurate charges.

➤ **Lines/Drains/Tubes**

- **Lines/Drains/Tubes** should be reviewed and **Completed/Discontinued/Removed** prior to discharge.
 - To complete the documentation, select the **Line/Drains/Tubes** hyperlink.
 - This will redirect you to iView to complete the appropriate documentation.
 - Click the  to return to the Discharge MPage.

➤ **Patient Education**

- Review patient education based on this visit problem listed provided by the surgeon.
 - Select appropriate educational material if not previously selected.

Completing the Patient Visit Summary

Complete the patient visit summary to print for the patient upon discharge.

STEP 1: Under **Create Note**, select **SurgiNet Discharge Instructions**.

STEP 2: Select the appropriate override reasons for the required fields.

- The required fields are not satisfied if the provider has previously completed these requirements on paper.

STEP 3: Review for completeness.

- Click **Sign/Submit**.
