

The PowerChart Maternity solution crosses from ambulatory to the inpatient setting, which improves the continuity of care provided throughout the patient’s pregnancy. The management of the blood loss inventory aids in performing an accurate blood loss calculation from delivery.

## Blood Loss Inventory

Inventory is typically managed by nurse managers and system administrators; however, any nurse can perform this action if an inventory item has been updated and the manger isn’t available.

### ➤ Locating the Blood Loss Inventory

- The icon for the **Blood Loss Inventory** is in the toolbar on your home page.
- Depending on your view, you may need to select the drop down to locate the icon.

### ➤ Add Items by Count

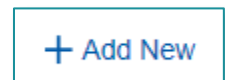

**STEP 1:** Click **Blood Loss Inventory** in the PowerChart Organizer toolbar.

**STEP 2:** Select your Organization and facility.

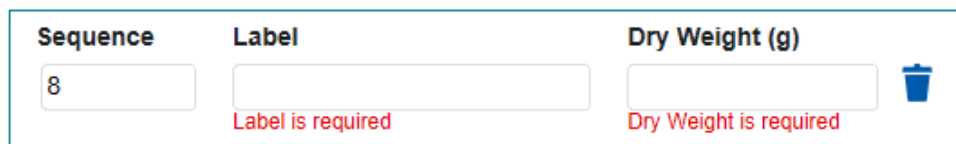

Organization:  Facility:

**STEP 3:** Click the **+Add New** button below the Items by Count section.

**STEP 4:** Add a label for the patient care item: towel, blanket, gown.

**STEP 5:** Add a dry weight for the item in grams. The item will be added.

Sequence	Label	Dry Weight (g)	
<input type="text" value="8"/>	<input type="text"/>	<input type="text"/>	

*Label is required* *Dry Weight is required*

**STEP 6:** Click **+Add New** again to add another item on another row. Items are displayed in the calculator based on the order of the items in the inventory.

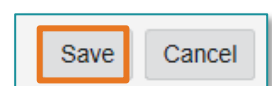

Sequence	Label	Dry Weight (g)	
<input type="text" value="8"/>	<input type="text"/>	<input type="text"/>	

*Label is required* *Dry Weight is required*

**STEP 7:** If an item is entered in error, click the **Delete** icon to remove an item from the list.

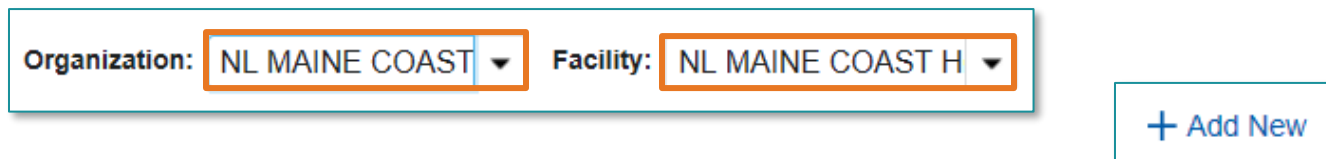

**STEP 8:** Click **Save** to save the inventory items. These items are now available in the calculator view.

➤ **Add Items by Measured Volume**

**STEP 1:** Click **Blood Loss Inventory** in the PowerChart Organizer toolbar.

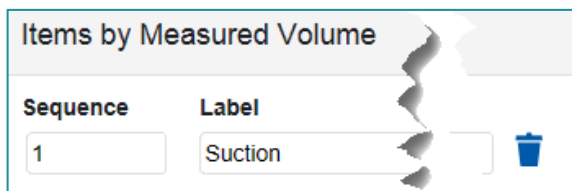

**STEP 2:** Select your organization and facility

Organization:  Facility:

**STEP 3:** Click the **+Add New** button below the items by Measured Volume section.

**STEP 4:** Add a label for the item, for example, **suction**.

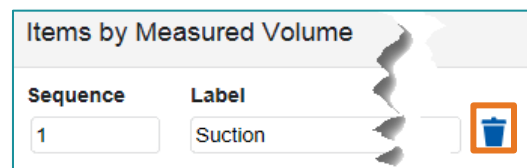

Sequence	Label
1	Suction

**STEP 5:** Click **+Add New** again to add another item on the row. Items are displayed in the calculator based on the order of the items in the inventory.

**STEP 6:** If an item is entered in error, click the **Delete** icon to remove an item from the list.

**STEP 7:** Click **Save** to save the inventory items. These items are now available in the calculator view.
