**Imaging staff can verify a patient's implanted port are recorded within PowerChart as PowerPorts.**

STEP 1:   Launch **PowerChart**.

STEP 2:   Type the **Medical record number**.

- Use the search icon if the medical record number is not available.
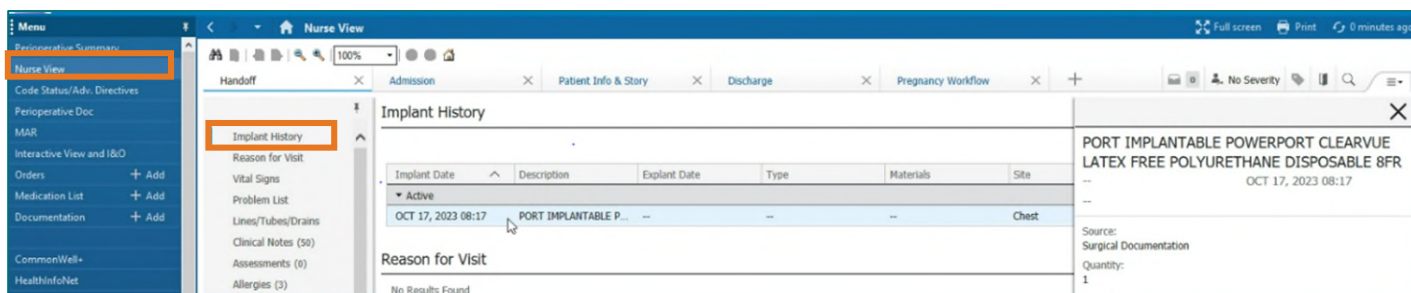

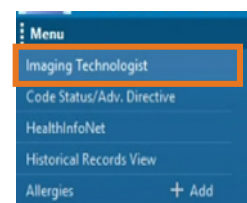

STEP 3:   Select **OK**.

STEP 4:   Select the appropriate viewpoint, **Nurse View** or **Imaging Technologist**.

STEP 5:   Select **Implant History**.

STEP 6:   Select **Port Implantable** to verify the port is a PowerPort.

NOTE: **If unable to locate the implant documentation within the component, search under Notes > Implant Device, then change the date criteria and the scanned document displays.**
