

Pharmacy Antimicrobial Stewardship Program (ASP) IV to PO alerts fire when a select list of IV medications are administered that meet Northern Light criteria for IV to PO conversion per policy.

## IV to PO Alerts

This alert rule will fire in the Clinical Surveillance Worklist when a select list of IV medications are administered that meet Northern Light criteria for IV to PO conversion per policy.

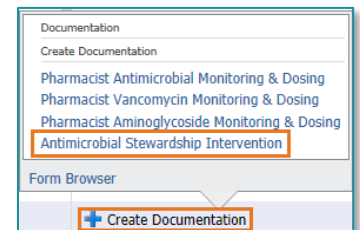

### ➤ Review data triggering the alert in the Clinical Surveillance Worklist

- Click into the Alert column.
  - The “Non-Abx IV to PO Candidate” alert is seen.
- Review detailed patient information.

### ➤ True Actionable Alert

- Move alert to **In Progress/Intervention** in the status drop-down.
  - Staff may select **In Progress**, complete the intervention form, then return to update status to **In Progress/Intervention** or **Completed/Intervention** depending on site workflows.
- After review of documentation, return to the Worklist and click the Blue plus sign within the documentation column.
  - Select the **Antimicrobial Stewardship Intervention** form.

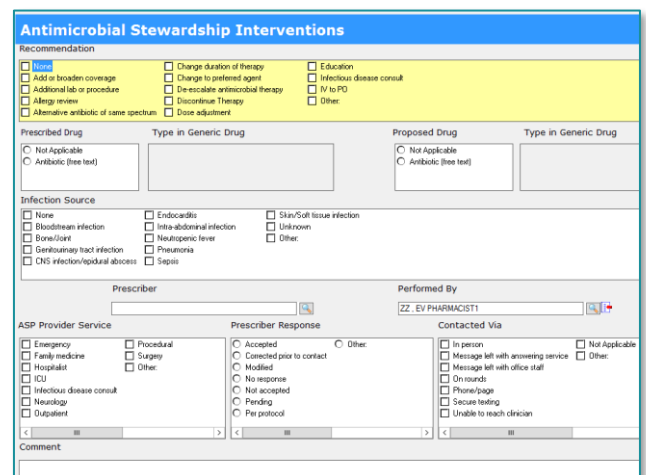

## Antimicrobial Stewardship Intervention Form Documentation

**STEP 1:** Choose IV to PO in Recommendation section.

**STEP 2:** In the Prescribed Drug section, select Antibiotic (free text) option to activate the Generic Drug window and enter appropriate medication names. Then select **Not Applicable** in the Proposed Drug section.

**STEP 3:** Infection Source section can be left blank.

**STEP 4:** Enter Prescriber Name.

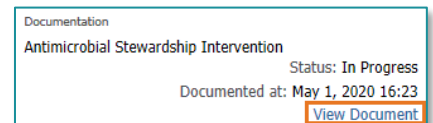

**STEP 5:** Leave the **ASP Provider Service** blank, select **Per Protocol** in the **Prescriber Response** section, and select **Not Applicable** for the **Contacted Via** section.

**STEP 6:** Briefly describe the intervention in the **Comment** section.

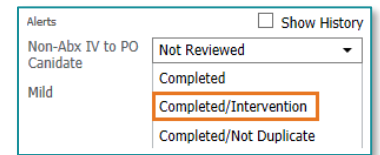

**STEP 7:** Click the green check if document is complete.

**NOTE:** This document may be saved at any time during charting with the floppy disk icon. To adjust or add to a saved note access it through the form browser or through the hyperlink in the documentation column. Once on form browser, highlight the note, right-click in the body of the note and **Modify**.

**Step 8:** Finalize by clicking into the Alert column and change the alert status to **Completed/Intervention**.

➤ **Not a True Actionable Alert**

- Move alert to **In Progress** in the status drop-down.
- Click the Blue plus sign within the documentation column.
  - Select the **Antimicrobial Stewardship Intervention** form.
  - Select **Other** in the **Recommendations** box and enter "*False Alert*".
  - Provide brief description in the **Comment** section at the bottom of ASP form and click the green checkmark to complete.
- Click into the Alert column and change the alert to **Dismissed**.
  - Enter applicable time frame for alert dismissal.
