

Anesthesiologists and CRNAs will have an updated view of the patient's EHR, with introduction of workflow MPages. This update will align with the Anesthesia module.

## Reviewing the Patient's Chart

The **Provider View** is available to all Providers within a patient's chart. The purpose is to provide a format for reviewing, ordering, and documenting actions that best fit a physician's workflow. The Provider View consists of viewpoints depending on position; the CRNA and Anesthesiologist positions have the MPages listed below.

- **Preanesthesia and Postanesthesia Workflow MPages**– Components that help review the chart quickly.
  - **Care Team** – Displays providers manually assigned as caring for the patient.
  - **Code Status** – Reflects Code Status documented on the Code Status Order.
  - **Problems List:** A provider can view, modify, or add to a patient's Diagnoses and Problems
  - **Histories:** Problem, Procedure, Family, and Social History can be viewed here. Flows from nursing documentation.
  - **Implant History:** View only component. Flows from nursing intraoperative documentation and from the Implant History tool.
  - **Pregnancy Overview:** Display information regarding the current pregnancy where applicable.
  - **Anesthesia Records**- Shows all anesthesia records.
  - **Vital Signs:** Displays in a flowsheet format.
  - **Labs Flowsheet:** A provider can view lab results for a patient. Filters can be changed to customize the lab results in view.
  - **Transfusion:** Shows history for all blood products received.
  - **Diagnostics:** A provider can open the diagnostic report and, if applicable, view the image or cardiac studies.
  - **Intake and Output:** Displays in a flowsheet format.
  - **Lines/Tubes/Drains:** View documented size and location of lines/tubes/drains.
  - **Allergies:** View, modify, and reconcile patient allergies.
  - **Medications:** Displays medications ordered in hospital. View scheduled, continuous, PRN, administered, and discontinued medications.
  - **Home Medications:** View, modify, and reconcile home medications.
  - **New Order Entry:** Search the order catalog, place single orders or PowerPlans, order from Favorites in this component.
  - **Documents:** Shows all In Progress and Completed documents. Single click to view notes in a preview pane. Click the **Add** button to create a PowerNote.
