

Effective June 12, 2019, there will be a new template to document expiration of a patient. This will replace the Discharge Summary/Discharge Order for the patient. Information entered by nursing into the Expiration Record Form will populate to the Death Summary. The Death Summary template is available for all member organizations utilizing Dynamic Documentation.

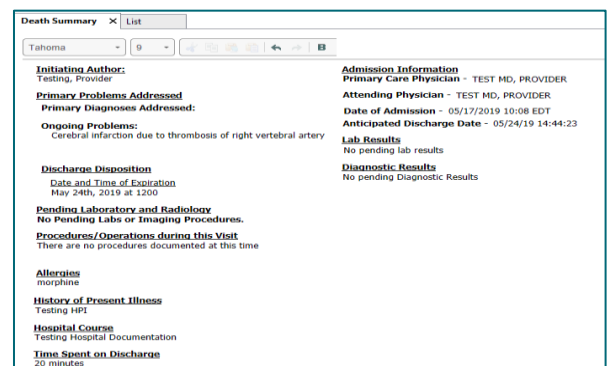

Death Summary Template

The Death Summary link is located at the bottom of the Discharge Workflow page from Provider View.

- The template is also located in Documentation by selecting the Note Type List Filter All and Type Death Summary. In the Note Templates, select Death Summary.

- The benefit to the Death Summary template is that many of the documentation elements from the Discharge Order and Discharge Summary templates that are not appropriate have been removed to expedite the documentation process.

NOTE: The Expiration Date/Time will auto populate if nursing has entered it in the expiration form prior to opening this template.
