

How to Install Cerner Mobile Apps on Android Devices:

You can watch a Video of these instructions by clicking [HERE](#):

1. Install Intune:

If you already receive your NLH work emails on your device on outlook, you can skip this step.

Install the Company Portal App

1. Press **Home** → **Play Store**
2. Search for **Microsoft Intune Company Portal**
3. Select **Install**

Enroll your Device

1. Press **Home** → Open **Company Portal**
2. Login with your NLH email address
3. **Begin** → **Continue** → **Continue** → **Enroll** → **Allow** → **Activate** → **Work or School** → **Agree to terms** → **Continue**

2. Install the following apps from the **App Store**:

(Search “Cerner.” This should pull up all four apps)

Cerner Camera Capture

Cerner InstaNote

Cerner Message Center

Click on the link Below to be taken to “Cerner Central”

[CLICK HERE](#)

a. Select the “Device Access” Option →

Device Access

Helps User Administrators manage which devices are allowed to connect to their enterprises resources in the Cerner Cloud. User Administrators can:

- Issue invitations
- Respond to access requests
- De-authorize lost/stolen devices and/or departing users

b. Log in with your Cerner PowerChart user name and password

c. Select “Request an access code to authorize your device” →

Welcome to Device Access Management

In this application, you can:

[View your authorized devices](#)

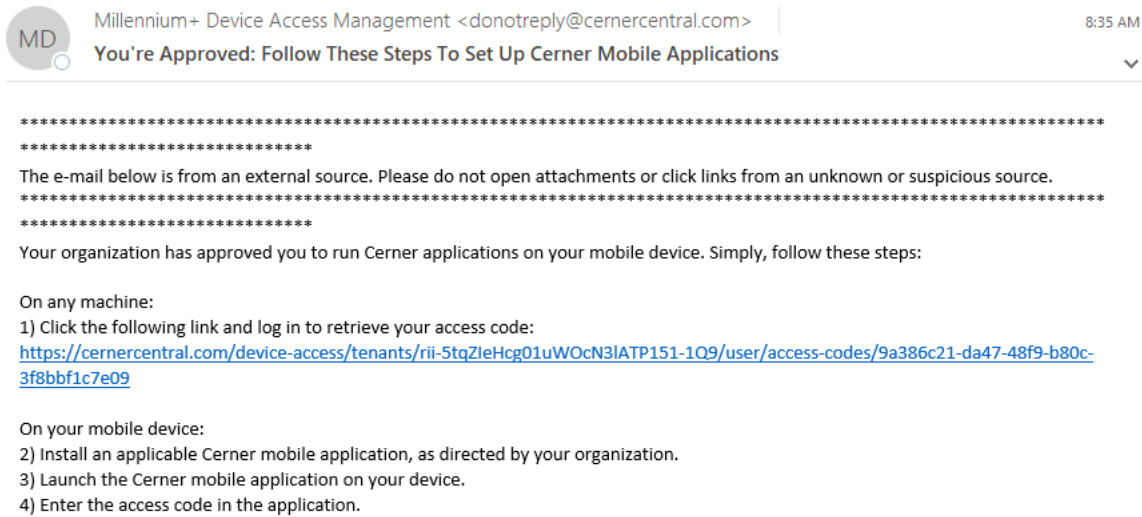

[Deauthorize a device that you have retired or lost](#)

[View access codes that have already been issued to you](#)

[View your pending access requests](#)

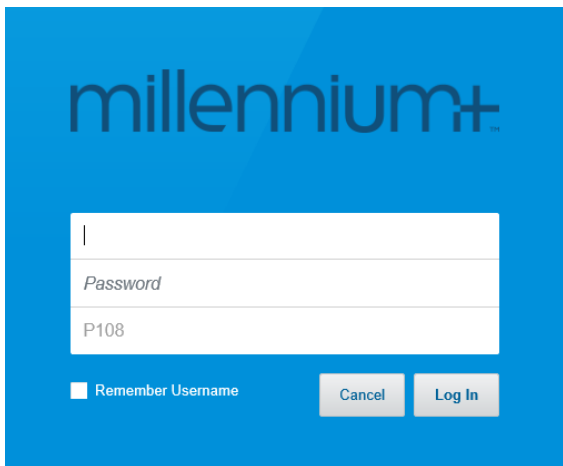

[Request an access code to authorize your device](#)

3. Check your work email for a message from donotreply@cernercentral.com and follow instructions:

Access code requests entered before 4:00PM will be approved same-day.

4. Log into all Cerner Apps using your Cerner PowerChart username and password.

5. Users will be prompted for their temporary access code. Please note that you must use the access code within 7 days of receipt; otherwise the access code will expire, and you will need to request a new code.
