

Beginning in January 2022, a new MIPS Clinical Quality Measure for Advance Care Planning will be implemented. All patients 65 years and older must have documentation of Advance Care Planning (ACP) discussion to meet the measure. Two recommendations have been created within PowerChart to assist providers in meeting the measure.

### Advance Care Planning Not On File Recommendation

Patients **without** documentation of an Advance Directive will receive an Advance Care Planning Not On File recommendation.

- To satisfy the recommendation, there will be **three discussion documented** order options available based on the amount of time spent discussing the ACP:
  - ACP discussion documented; <16 min (1123F)
  - ACP discussed and declined/unable to obtain (1124F)
  - ACP explained and discussed; 16-30 min (99497 billable)
