

HealthIntent is a platform using several modules together to gather data for advanced analytics. HealthRegistries will be available on the Recommendation component September 30, 2019.

The Pending tab will maintain its current functionality. Clinical staff will have the ability to place orders on recommendations that are Due, add New Recommendations as appropriate, mark as Canceled or Refused. Modifications may also be made to the due date when clinically appropriate.

HealthIntent Changes to Recommendations

Recommendation	Due	Last Action	Recurren...	Source	Orders
Influenza Vaccine	In 2 months	--	Seasonal	--	Orders
Diabetes Maintenance-Foot Exam	In 4 months	Documented (7 months ago) - DL...	Every 1 YR	--	
Depression Screening	In 8 months	13 (3 months ago)	Every 1 YR	--	

Fluoride Screening
 Due: OCT 04, 2019 (4 weeks) Every 1 YR

Category/Registry

2018

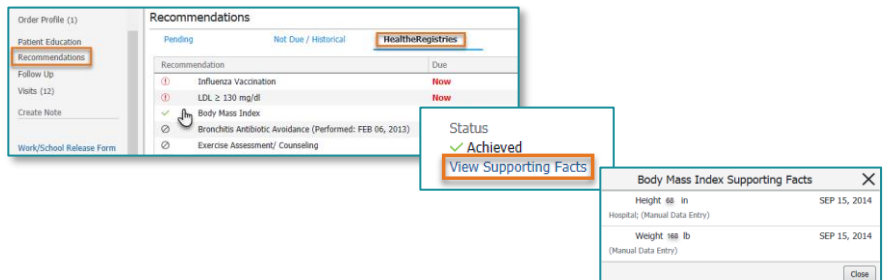

- Satisfied by Order (Performed Date: OCT 04, 2018)
 Fluoride 5% dental varnish
- Satisfied by Note (Performed Date: OCT 04, 2018)
[Maine Oral Health Risk Form](#)
 Performed By: ZZ, AMB MA CERT P1

➤ Not Due/Historical

- Favorites has been replaced with **My Role** or **Group by Category** filters to reduce the visible Active items as needed.
- Providers can place orders from this screen.
- When reviewing **Pending** or **Not Due/Historical** recommendations, providers can click on the item to open a side window.
 - There will be dropdown to expand and see who satisfied the order, as well as a blue hyperlink to the documentation if a form is available.

➤ HealthRegistries

- This tab will display **Due** , **Met**  and **Excluded**  icons beside recommendations.
- Providers will also be able to click recommendations to see **Supporting Facts**.
 - The data source will be listed on the Supporting Facts window, such as Hospital, Manual or Claim.
