This flyer outlines the process for releasing blood products that have not been used for your patient during a transfusion.

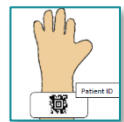

---

## Releasing Blood Products

Units have been loaded up on the table in the Multi-Transfusion Protocol (MTP) workflow and are not needed.

**STEP 1:** Open Bridge.

**STEP 2:** Scan patient's wristband to open the chart.

**STEP 3:** Select **Multi-Unit Transfusion**.

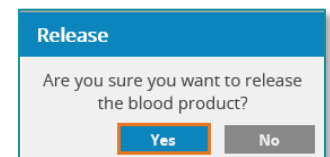

**STEP 4:** Answer any checks as applicable, then select **Continue**.

**STEP 5:** Click the trash can in the **Release** column for the units that need to be returned.

**STEP 6:** Select **Yes** when prompted to confirm you want to release the blood product.

**STEP 7:** Select **Exit** to return to the Main Menu.
