## Electronic Health Record

## Tenecteplase Update

On **Monday, April 1**, Tenecteplase 50 mg INJ will be updated to include divisibility, **reducing the need for nursing to use pyxis override for doses requiring less than the whole vial.**

Tenecteplase 50 mg vial is currently marked not divisible, which has led to significant issues with workflow and patient safety. **All doses for Tenecteplase will now align with the pyxis formulary to be available for distribution and display on the pyxis profile accordingly.**

**NOTE:** Pharmacy/Nursing: Please remove Pyxis alerts or signs instructing nursing to override.

Clinical Informatics – Please share this information with **Inpatient and ED nurses and pharmacists** and make this a topic of discussion in upcoming rounding.

***Behavioral Health:*** This information **does not** affect behavioral health caregivers.

**NOTE:** This mailbox is not frequently monitored. Please direct any questions to the Clinical Informatics team using this link.
