

NL EMMC Timed Lab Studies

Effective **immediately**, any NL EMMC Providers ordering a lab for a **specific time** must choose **Timed Study** in the Collection Priority field. Phlebotomy staff are newly using CareAware to collect lab specimens and view the ordered studies. Ordering these as a timed study will bring that order to the forefront of their worklist. As such, it will be more noticeable and will prevent these important timed studies from being collected late.

Details for Basic Metabolic Panel (BMP)
