

CareCompass Task for Stored Patient Medication

If medications are being stored for the patient, the location should be selected in the **General Info** section of the Admission History form.

Upon placement of the Discharge (dx) order, a task fires to CareCompass prompting the nurse to return the patient’s medications.

Transfusion Charge Documentation Reminders

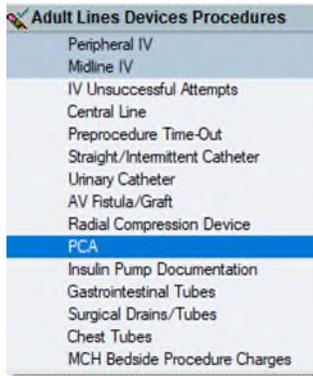

- The Transfusion Charge Documentation form has been updated with a new section to select the facility where the transfusion was administered.
 - Select the nursing unit/area that the transfusion took place.
- NLH is allowed to bill for only one transfusion per calendar day.
- If more than one transfusion is given in a calendar day, a task to the ED LaunchPoint Activities column or to CareCompass will only fire the first transfusion.
 - **Example:** Two units are ordered. The first one is started at 1500; a task will fire. The second unit is started at 2100. No task will fire.
 - **Example:** Two units are ordered. The first one is started at 2200; a task will fire. The second unit is started 0300. A task will fire for this unit because it is the first one in that calendar day.

NOTE: To see if a Transfusion Charge Documentation Form has already been documented, navigate to the Form Browser and view the calendar day.

Where is PCA Documentation Located?

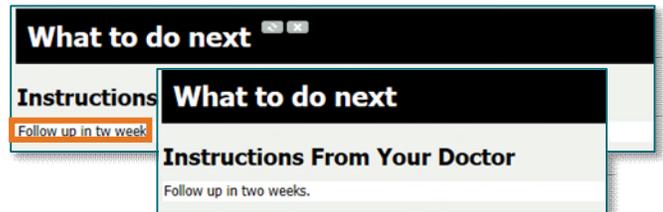

PCA (Patient Controlled Analgesia) documentation is located in the Lines Devices Procedures Interactive View and I&O bands.

Patient Discharge Summary Update

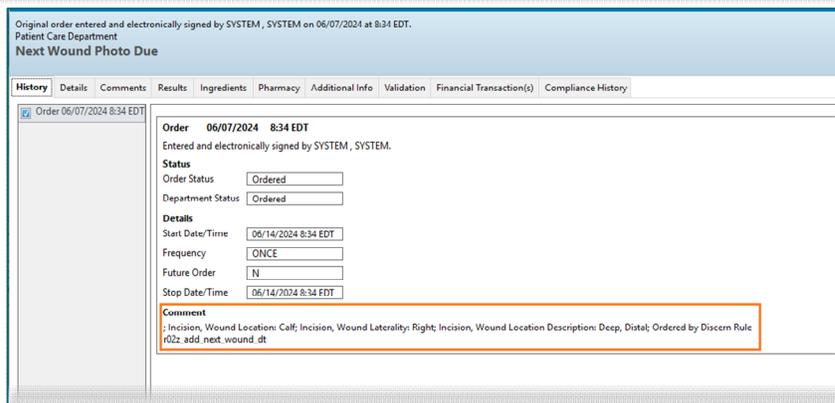

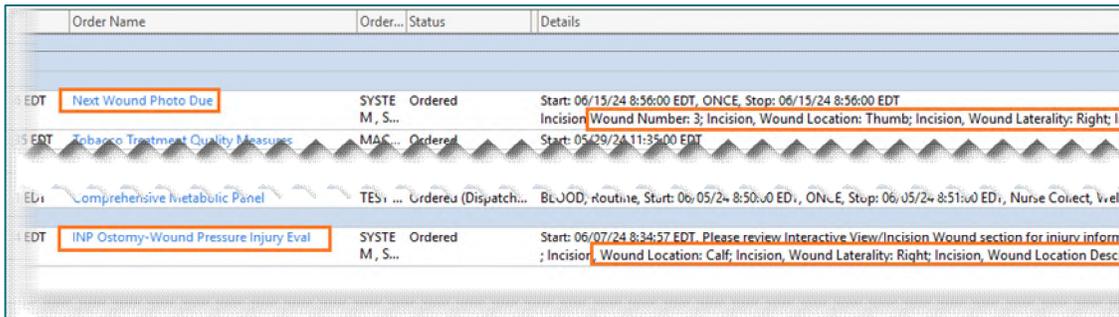

Effective Tuesday, June 25, nurses will be able to correct typos in the Patient Discharge Summary that flow from Provider Patient Instructions.

Click anywhere in the documentation to make the edits.

Wound Rule Updates

When documenting the **Date and Time for Next Wound Photo** for a wound or pressure injury, the order and task displays a comment that indicates the link to the appropriate dynamic group and subsequent task.

CareAware Connect (EMMC Only)

How do I get back into the App if I forgot my PIN?

After being inactive for a length of time, your device app will ask you to enter a PIN if one was set up. If you have forgotten your PIN, follow these steps to access the app and create a new PIN.

- In the window prompting for your PIN, tap the ellipsis button from the top right corner. 
- Tap **Log Out**.
- Sign back into the app with your credentials.
- Open the **Table of Contents** in the upper left corner, then tap **Security**.

NOTE: If the Patient Search window is blocking the Table of Contents from view, please close the window with the X in the top right corner.

- Tap **Remove PIN**.
 - You cannot choose **Change PIN** as it will require you to enter your current PIN first.
- Tap **Security** from the Table of Contents again, and then tap **Create PIN**.
- Enter a new four-digit PIN. You will be prompted to enter the pin a second time.
